Inspection Check List for: Cradle

Risk assessme Frequency of the In-service inspection done by the user/owner	User		
operation manual & Maintenance Record available upon request write either(• both available, • operation manual only)	Available		
Labels and decals for operation on the lift write either(• available • owner provided)	Available		
Previous 3rd party certificate if any write either (New equipment (first inspection) present and valid present and invalid Not available)	Available		
Operator training proof write either (• training certificate available• brief training provided by inspector• Experiences proof)	Safe		
Operator training proof write either (• training certificate available• brief training provided by inspector• Experiences proof)	Available		
Appropriate PPE for the operator write either(• helmet • shoes , • harness, • safety	Safe		
reflection jacket) Is the environmental contain any hazardous conditions such as, extreme humidity, dust, sand, salt air, etc. write either (• air conditioning• periodic break• water present• supervision• safety goggles)	Safe		
Is the location is next foot walks or traffic workstation or public areas write either (• present, • site condition not required)	Safe		
Isolate all area, and put sign board for inspection progress write either (• present • site condition not required)	Yes		
Manufacture documents matching the lift installed write either (• yes matching • verification with the manufacture after inspection)	Safe		
Ensure the foundation/test area floor is adequate and leveled write either (• leveled, leveled with ease of facility/equipment)	Safe		
Housekeeping, where applicable write either (• clear • clear after rectification)	Safe		
Wind speed within the limits (12.5 m/s) write either (• within the limit, • waiting to be reduced)	Safe		
Hazards from electrical lines write either (• obstruction provided • safe distance)	Safe		
Approval from structure engineer/authority for the foundation write either(• approval available • inspector verification on the foundation (torque test for bolts & visual inspection))	Na		
Adequate lighting	Safe		
Preform tools box meeting	Done		
machine.	No No		
Cradle-Electrica			
No damage to panel enclosure	Safe		
Condition of the wires and distribution board	Safe		
No damage, cracks to the cables	Safe		
Availability of RCD (30 mA)	Safe Safe		
No leakage b/w PE – N shall be 0-50 v No continuity b/w the phase and the PE	Safe		
Phase monitoring device	Safe		
Damage to the main contactors, fuses	Safe		
Continuity test acceptable value (0-5) ohm	Safe		
Insulation resistance test report by the maintenance company	Safe		
Cradle-Suspension R	igs (Davits)		
Check Davit base	NA		
Check turning bracket (rotating davits)	NA		
Typical spacing between the two davits if its complying with the platform length	NA		
All bolts and nuts should be checked for integrity, with a torque wrench or hammer	NA		
Cradle-Suspension Rigs (M			
Check monorail track	NA		
Check supporting bracket	NA NA		
End stoppers Charlet traversing trailers for smooth	NA NA		
Check traversing trolley for smooth	NA NA		
Operation (motor condition - rope driven – manual) Spacing between the brackets , and typical overhang	NA		
Clearance of W 0.5 m, H 1.8 m against trapping	NA		
All bolts and nuts should be checked for integrity, with a torque winch or hammer	NA		
2 III 2016 and hate should be encered for integrity, with a torque which of namific	- 1		

check for spacing between monorail joint and availability for splices or welded joints.	NA
Cradle-Suspension Rigs (Ro	of Trolley System)
Integrity of counterweight	NA
Caster condition and brakes	NA
Hydraulic jibs	NA
Hoisting mechanism	NA
Cross bar / spreader bar	NA
Mortised frame	NA
Integrity of counterweight	NA
Caster condition and brakes	NA
Protection bars available with a distance not exceeding 20 m	NA
Guide rollers / flanged wheels	NA
Guards for all of the moving part, electrical panels and machinery	NA
Traversing speed shall not exceeds 0.3 m/sec	NA
Limit switches for motions	NA
Cradle-Suspension Rigs	(Track System)
Base plates	NA
Bolts & nuts	NA
Beams elevation specially on articulated sections	NA
Damage for wheels surface, cracks, wear.	NA
Broken teeth , pinion engagement (in case of rack- pinion system)	NA
Cradle-Suspension Rigs (Su	ispension Beams)
Base section	Safe
Securing bolts and tension in ropes using proper clamps	Safe
Counterweight integrity with security	Safe
Sheaves and rope pulley comply with the requirement of rope diameter	Safe
Rope clamps	Safe
Separated suspension point	Safe
Spacing between the two suspension beams complies with length of the platform	Safe
Cradle-Suspension Rigs (I	Parapet Clamps)
Check integrity of the supporting structure, it shall be capable to withstand 4 times the load imposed by the parapet (concrete most of the times)	Safe
Design of the manufacture	Safe
Capacity of the parapet complies with the safe working load of the cradle taking into consideration the safety factor	Safe
No damage on the screw jack, pads, threads	Safe
Spacing between the two suspension beams complies with length of the platform	Safe
Cradle-Suspension	on Point
wire rope termination on each suspension point signs for damage or deformation for accessories	Safe
separated suspension for both wires (suspension and secondary)	Safe
Cradle-Suspended	Platform
Guardrails, intermediate rails and toe boards shall be free for deformation or distortion or missing	Safe
Wall rollers , caster wheels	Safe
	Safe Safe
Wall rollers, caster wheels	
Wall rollers , caster wheels The minimum internal width of the platform should be not less than 500 mm.	Safe
Wall rollers , caster wheels The minimum internal width of the platform should be not less than 500 mm. Sound , slip resistance , drainage holes , maximum opening 15 mm diameter	Safe Safe
Wall rollers, caster wheels The minimum internal width of the platform should be not less than 500 mm. Sound, slip resistance, drainage holes, maximum opening 15 mm diameter The height to the top of the guardrail shall be not less than 1,0 Vertical distance between the intermediate rails and either guardrails or toe boards	Safe Safe Safe
Wall rollers, caster wheels The minimum internal width of the platform should be not less than 500 mm. Sound, slip resistance, drainage holes, maximum opening 15 mm diameter The height to the top of the guardrail shall be not less than 1,0 Vertical distance between the intermediate rails and either guardrails or toe boards shall not exceed 500 mm. Toe boards shall be not less than 150 mm above the surface of the platform decking.	Safe Safe Safe Safe
Wall rollers, caster wheels The minimum internal width of the platform should be not less than 500 mm. Sound, slip resistance, drainage holes, maximum opening 15 mm diameter The height to the top of the guardrail shall be not less than 1,0 Vertical distance between the intermediate rails and either guardrails or toe boards shall not exceed 500 mm. Toe boards shall be not less than 150 mm above the surface of the platform decking. (TSP)	Safe Safe Safe Safe Safe Safe

Overload device (1.25 RL ,1.25 WLL)	Safe	
Roof mounted hoist, device install for stopping lowering the platform with no load	Safe	
condition Cradle-Limit Sw		
Anti-tilt device	Safe	
Lifting limit switch	Safe	
All of trolley motions (traversing, slewing, and telescoping) shall be provided with		
limit switch.	NA	
Ultimate limit switch	NA	
Lowering limit switch (BMU only)	NA	
Cradle-Hoist D	NA	
No damage, deformation, wire coils operation Secondary wire rope	NA	
Wire rope run and laid evenly on the drum	NA NA	
Drum flanges present without damage with 1.5d	NA NA	
Cradle-Secondary		
Secondary wire rope	Safe	
Fall arrest device (tilt 14o, over speed 0.5 m/s)	Safe	
Cradle-Pulle		
Groove diameter 0,52 to 0,65 d	Safe	
Opening angle 30°- 55°.	Safe	
Depth shall be 1.4 d at least	Safe	
Cradle-Wire F No sign for damage, bird caging, deformation and strand cut	Kope Safe	
Allowed 10 cuts of 30.d	Safe	
Cradle-General Req		
Labeling for SWL, and WLL on the hoist	Safe	
Serial numbers of hoists, secondary devices and control box	Safe	
Electrical wiring diagram for the control box	Safe	
Warning signs inside the platform	Safe	
Cradle-Descri _l	otion	
Manufacture	Hoist	
Model	Ltd 800	
Serial number(Platform)	17	
S. No motors	170801021, 170801038	
S. No safety devices	170801030, NA 1.5+1.0 m	
Span Operation height	1.5+1.0 m 1st floor up to 12th	
Elevation	Front corner	
Support description	Supported on 13th floor by two suspension beams secured by counter weight 500 kg	
Safe working load (SWL)	NA S	
Proof load applied	Na	
Location	1st floor	
Grindlines(if provided)	NA	
Accredited Standard and Procedure	BS EN 1808:2015 , BSS-INPR-002	
NDT (If required)	NA	
Instruments used in inspection	MT06,DC,AM01,VT1	
Subcontract Parts Environment Conditions during inspection	NA Cood	
Environment Conditions during inspection Last Inspection Date	Good NA	
Additional comments (If any)	NA NA	
Any major repair if found / detail	NA	
Cradle-Documents required		
Manufacture catalog / certificate /manual	Safe	
Manufacture catalog / certificate /manual	Safe	
Calculation for suspension Rig	Safe	
Wire rope certificate / manufacture information for wire rope	Safe	
Structure ,stability and mechanical calculation and electrical drawing	Safe	
Tighten torque report for bolts if used	Safe	
Maintenance log sheet	Safe	
Previous inspection report	Safe	

cradle - Defects				
	Toeboard need to install on one side, electrical safety RCD30ma is not work during inspection, one side handrail 1m is not installed properly.
